and Shoes**

**Clothing**  
In fact everything a man needs  
to eat and wear

**THE PIONEER STORE  
J. A. E. BEAUPRE**

## THE OPPORTUNITY OF A LIFE-TIME TO SHARE IN THE PROFITS OF A NEW INVENTION

We hereby offer for sale a limited amount of our CAPITAL STOCK at par, TEN DOLLARS PER SHARE, in order to facilitate the more rapid development of our business.

We own exclusive patents for the United States and Canada covering the "MOMBERY" CARBURETOR, which has proven to be THE ONLY SUCCESSFUL GENERAL PURPOSE KEROSENE CARBURETOR IN THE WORLD, in addition to being more ECONOMICAL and EFFICIENT with gasolene and being entirely unaffected by FOG or ALTITUDE, which is a great advantage over other carburetors.

LIMITED SHAREHOLDERS have already been made by original investors, even for small amounts, from our inventions with wide demand such as the BELL TELEPHONE, NATIONAL CASH REGISTER, WESTINGHOUSE AIR BRAKE, etc., and we are prepared to prove that the profitable earning possibilities of our carburetor compare very favorably with any of the above.

In an investment of this nature, MERIT, COMMERCIAL DEMAND, MARGIN OF PROFIT AND EXCLUSIVE CONTROL OF EXTENTIONS as well as responsibility of management should be investigated, and I will be glad to furnish information to this end.

PRACTICAL DEMONSTRATIONS of the above carburetor, as well as PATENTS and PROSPERITY, can be seen at 718 Fourth Street east (Cathedral Block, corner Eighth street and Fourth street east), Calgary, Alta.

INVESTIGATE AND ACT WITHOUT DELAY, as this company, though in its infancy, has a practically unlimited field, and price will be advanced considerably after a limited amount of stock has been sold.

Any two of the undermentioned are hereby authorized to sign temporary receipts for payments in cash and a receipt for delivery of regular certificates.

H. M. WERNICK, 718 1/2 St. East, Calgary, Alta. A. F. ENKIN, Gleichen, Alta.  
W. BRUCE CAMPBELL, 718 1/2 St. East, Calgary, Alta. W. H. McKIE, Gleichen, Alta.

## Hydro-Carbon Vaporizer, Limited

HEAD OFFICE: For William, Ont. W. H. McKIE, President.

## Bulls Bring Good Price at Lacombe

There were 37 bulls offered at the Lacombe Bull Sale which was held under the auspices of the Alberta Cattle Breeders' Association, on May 28th, 1912, and 36 animals found buyers at good prices. The average price paid was \$85.00.

The highest price paid for an individual animal was \$235.00 for a Shorthorn bull exhibited and bred by P. A. Switzer of Lacombe. ABERNETHY A.G. 12—There were four Angus bulls sold at an average price of \$152.50; the highest price paid for any animal of this breeding was \$205.00.

SHORTHORNS—There were ten Holsteins; the average price being \$75.00 and the highest price secured for any one animal was \$85.00.

HEREFORDS—There were six Herefords, which sold at an average price of \$140.83. The highest price was captured David Palmer of Lacombe, for Alberta, Horned 30th, which sold at \$185.00.

SHORTHORNS—The Shorthorns numbered 28. The average price paid was \$119.17. The highest price realized was \$235.00, as above stated.

The bidding had continued because it was apparent from the fact that there were not enough bulls to go round.

It is evident that interest in beef cattle is on the increase in Alberta.

## Farming Requires Brains

Success in dry-farming is not for the shiftless or the indolent. A farmer requires brains to make it profitable. It involves hard work and plenty of it.

Dry-farming is not simply a matter of conserving the moisture from year to year. But this does not present insuperable difficulties. By proper management a dried field can be made a reservoir through the accumulation of moisture beneath the surface.

The moisture which falls as rain or snow must be made to penetrate the surface, and when once imprinted as to escape by evaporation must be prevented. Tillage is the means by which both these objects may be attained—breaking up the soil in the first place by deep plowing in order that the water may sink into it, and stirring the surface so that a mulch of loose powdered earth may keep the channels of evaporation closed.

## LOOK PLEASANT

Anyone who feels disposed to take a cheerful view of things and to wear a pleasant face can find among the recorded words of the best men of all times many suggestions for so doing. Emerson tells us that "A cheerful, intelligent face is the end of culture and success enough," while Johnson says: "A habit of looking on the bright side of every event is better than a thousand plumes a year."

Somehow some writer has set it down that he would rather be unacquainted in some line than of the sea with a cheerful companion than make a lightening tour of the world with the serious visage of a person, who for he might be lacking in dignity, refuse to see and to laugh at the funny side of things. Shakespeare asks: "Why should a man whose blood is warm within sit like his grandsire cut in alabaster?" and no one has seen fit to try and find a reason for such a procedure.

Frank, free and open nature almost comes to suggest the real happiness of the grave, dignified, mysterious man who is content to keep every day at some distance from him. He who writes, "Politely no admittance," on his door mat, knows his visitors no more clearly than does he who writes a similar notice across his features.

## The Horse and its Cost

Carefully conducted investigations by the agricultural department of the University of Minnesota, as well as those conducted by the office of farm management of the United States Department of Agriculture, have shown that under ordinary conditions on American farms work horses are utilized only about three and a half hours a day on the average. Horse power is thus utilized to less than half its capacity. For the same reason this power costs more than twice what it should cost. The full utilization of the power actually available would thus produce approximately the cost of producing horsepower of less than one-third of the cost of getting a work horse to do the average about \$125 a year.

The average utilization of the horse is about 1250 hours a year, at an hourly cost of 10 cents per hour. If we double the number of hours work the horse does—and this can be done without injury to the animal—we reduce the hourly cost to five cents—twice the hourly cost.

As a result of the farm management and plant industry, United States Department of Agriculture, Washington, D. C.

## Bulls Bring Good Price at Lacombe

There were 37 bulls offered at the Lacombe Bull Sale which was held under the auspices of the Alberta Cattle Breeders' Association, on May 28th, 1912, and 36 animals found buyers at good prices. The average price paid was \$85.00.

The highest price paid for an individual animal was \$235.00 for a Shorthorn bull exhibited and bred by P. A. Switzer of Lacombe.

ABERNETHY A.G. 12—There were four Angus bulls sold at an average price of \$152.50; the highest price paid for any animal of this breeding was \$205.00.

The bidding had continued because it was apparent from the fact that there were not enough bulls to go round.

It is evident that interest in beef cattle is on the increase in Alberta.

According to a report submitted to the International Dry-Farming League, whose headquarters are at Lethbridge, Alberta, there are nearly 30,000,000 acres of land in the western United States now under cultivation by dry-farming methods. Colorado heads the list with over 9,000,000 and 12,000,000 acres devoted to the crop production without irrigation. Kansas, Nebraska, the Dakotas, Montana and Texas have each more than 2,000,000 acres. The report says further:

"While the rainfall in Minnesota, Wisconsin, Illinois, Indiana and Indiana is ordinarily sufficient to produce good crops one year with another, it is known from personal experience and observation that it is possible to meet anywhere to increase the yield of crops by following dry-farming methods. A widespread adoption of such methods would mean a saving of millions of dollars to the income of farmers all through the central portion of the country."—Gus Barlow, St. Paul, Minnesota.

A trophy that is attracting considerable interest in Southern Alberta is the \$10 silver cup donated by R. A. Barker, president of the Canadian Life Assurance Co., to the International Dry-Farming Congress for the best plot of potatoes grown under dry-farming conditions in Southern Alberta.

An imaginary line drawn east and west about 10 miles north of Calgary and subdivided into lots of about 21-26. There are many successful potato growers in this section, and this competition promises to be one of the features of the exposition next October.

The success of a town depends upon the public spirit of its leading citizens. If the leading men are unwilling to lay out abundantly the buildings and advertise the industries offered in their town or district and are not willing to patronize home trade, to help the industries, then no town, be its advantages ever so great, can expect to grow and flourish. The natural advantages are good accessories to any place, but public spirit backed by common sense and energy will turn the prairie into a flourishing town.

Subscribe to the Bow Valley Call. If there is anything new to say about a man it is always said at his funeral.

No man is justified in considering marriage a failure merely because his wife moves.

Ben Franklin was a dry-farmer, for he wrote "How few while sluggards sleep."

People who try to impress upon their wives that it is difficult to unhook both ends meet.

Improvement of the soil has accompanied the failure to improve and control the rainfall.

Some men get rich on farms and others fall. Ten farmers' sons farm systematically and none do not.

The living table should be of a light solid to the farmer; not too much to cause the water to stand in a shallow position nor high as to necessitate the lifting of the mother while feeding.
